

How to install flex in your home computer:

We are assuming that you have already installed codeblocks with mingw in your home pc.

- Go to your Codeblocks installation directory, under which you will find MinGW folder. Inside this, there is a bin directory add this 'bin directory path' to your PATH environment variable.
 - Sample bin directory path: "C:\Program Files\CodeBlocks\MinGW\bin"

- Now install flex in your home computer double-clicking flex-2.5.4a-1.exe.
- It must be installed in C Drive.
- Similar to earlier, add your flex bin directory path to the PATH variable.
- Let sample flex bin directory, "C:\GnuWin32\bin"
- Inside the flex GnuWin32 folder there is a folder called lib, where there is a file called, "libfl.a", copy this to your codeblock mingw lib directory (Sample such directory, "C:\Program Files\CodeBlocks\MinGW\lib")
